

Take It To The Maximum

ENJOY THE ADVANCED FEATURES AND MAXIMUM SWITCHING QUALITY OF THE VP-771

The VP-771 scaler/switcher is one of Kramer's new presentation scaling switchers, designed as the answer to today's demanding applications.

The VP-771 accepts one of nine inputs. It scales the video to a number of output resolutions, up to 2K/1080p, embeds the audio, and outputs the video signal simultaneously to one HDMI, one computer graphics, one 3G HD-SDI and one DVI-D Twisted Pair. It also outputs the audio signal simultaneously to a digital audio output, an unbalanced stereo audio output and a 2x10-watt amplified balanced stereo speaker output.

The VP-771 offers a versatile feature set that includes Picture-in-Picture functions, Luma-Keying, 2K Resolution, and more, using the latest technologies of digital signal processing.

The VP-771 scaling switcher won the 2013 Systems Product of the Year AV Award.
